Professor Jean Faivre* and Ms Deborah Alsina

Topic 2 Access to Medicines - All hands on deck
Dr Rob Glynne-Jones and Ms Barbara Moss

Topic 3 RAS Testing - Time is critical
Professor Han van Kreiken** and Mr Vitor Neves

Discussion Ms Jola Gore Booth, CEO and Founder
EuropaColon

* Professor Jean Faivre is French representative EU Advisory Committee of cancer experts

** Professor Van Kreiken is President of the European Society of Pathology

Who is responsible anyway?

Medicine, methods of treatment and approaches to care are constantly advancing:

- Some of these changes reach the patient, others don't
- Some clinicians change the way they treat, some don't
- Some changes are adopted at national level through a cancer plan but in some countries nothing changes.

But who is responsible for making sure advances are adopted across a country? Do only the Minister and Ministry of Health need to keep abreast with change?

Do we as clinicians, nurses, patient organisations and patients have a role to play?

Will this be you?

Delivering change can be challenging, can you help bring about better care for all cancer patients in your country?

Join us on 26th June at 10.00-11.00

CCIB Room 122 (1st floor) for a lively debate with

Professor Eric Van Cutsem, Professor Jean Faivre and Professor Han van Krieken, Dr Rob Glynne Jones, Ms Jola Gore Booth (CEO/Founder EuropaColon), Ms Deborah Alsina (CEO Bowel Cancer UK), Ms Barbara Moss (Patient Advocate) and Mr Vitor Neves (CEO EuropaColon Portugal)
