

EU Health Summit 2018

Published 07 November 2018

As we head towards the European Parliament elections in 2019, healthcare systems and citizens across Europe are facing unprecedented challenges arising from an ageing population, and increased prevalence of chronic diseases. At the same time, rapid scientific developments are leading us into a new era of innovation.

What is the role of the European Union in helping European health systems to make the most of these opportunities for the benefit of citizens and patients, while following a sustainable path?

How can different sectors converge to help ensuring a healthy future for Europe?

Join the first ever multi-stakeholder summit organised by 28 organisations from within and across the health community to discuss how Europe could develop and take the lead in areas such as research and innovation, health data and digital health, healthcare organisation and financing, as well as health in all policies.

The summit will take place on 29 November at the Crowne Plaza Hotel in Brussels. To register, [click here](#). For more information, please visit our website: www.euhealthsummit.eu
